

Data Sheet

Model: TSH14/25/610

1400 °C Maximum Temperature,
Single Zone Horizontal Tube Furnace

INTRODUCTION

The TSH14 furnace is a bench mounted tube furnace ideal for most general laboratory thermal processing applications.

The TSH14/25 Single Zone Tube furnace can accept a work tube with internal tube diameter of 25 mm. TSH14/25 range offers a choice of three heated zone lengths of 180 mm, 450 mm & 610 mm.

TSH14/25/610 comes with a heated zone length of 610 mm.

TSH14/25/610

SPECIFICATIONS

Maximum Temperature: 1400 °C

Maximum Continuous Temperature: 1350 °C

| These models are heated by axially mounted silicon carbide elements around the work tube for fast heat up and excellent temperature uniformity.

| This furnace design requires the use of a separate work tube of a grade suitable for the maximum temperature rating of 1400 °C.

| A work tube is not supplied as an integral part of the furnace and therefore needs to be purchased with the order as it is an essential accessory.

| Temperature Sensor: 'R' type Thermocouple.

| Energy efficient, high quality, low thermal mass insulation.

| High end Microprocessor PID controller.

| Horizontal models are supplied as standard with controls in the base.

External Dimensions (mm):	H	x	W	x	D	Net Wt.
(Nominal) TSH14/25/610	715	x	1150	x	460	75 kg

| Supply: 230V– 1 Phase – 50/60Hz

| Energy rating: 6.0 kW (Average)
10.1 kW (Peak)

OPTIONS

| Work tubes of various materials, lengths and diameters for use in the furnace.

| The work tubes are available for containment of atmosphere or protection against process contaminants.

| A variety of triple flange gas tight end seals for work tubes to allow processing under vacuum or gas atmospheres.

| Multi segment, multi program storage controllers.

| Over temperature protection controller.

| Thermal Radiation Plugs.

Vertical versions are available which have a separate console
