# Data Sheet Model: TSH17/75/300

1700 °C Maximum Temperature, Single Zone Horizontal Tube Furnace

## INTRODUCTION

The TSH17 furnace is a floor mounted tube furnace ideal for most general laboratory thermal processing applications.

The TSH17/75 Single Zone Tube furnace can accept a work tube with internal tube diameter of 75 mm. TSH17/75 range offers a choice of three heated zone lengths of 300 mm, 450 mm & 600mm.

TSH17/75/300 comes with a heated zone length of 300 mm.

## SPECIFICATIONS

Maximum Temperature: 1700 °C Maximum Continuous Temperature: 1700 °C

These models are heated on both sides of the chamber by molybdenum Disilicide elements.

This furnace design requires the use of a separate work tube of a grade suitable for the maximum temperature rating of 1700 °C.

A work tube is not supplied as an integral part of the furnace and therefore needs to be ordered with the furnace as it is an essential accessory.

- Temperature Sensor: 'B' type Thermocouple.
- Energy efficient, high quality, low thermal mass insulation.
- High end Microprocessor PID controller.
- Over temperature protection controller.
- Horizontal models are supplied as standard with controls in the base.

External Dimensions (mm)	): H	х	W	х	D	Net Wt.
(Nominal) TSH17/75/300	1500	х	625	х	650	220 kg

Supply: 230V- 1 Phase - 50/60Hz

Energy rating: 6.0 kW

#### PHASE CONTROL

Phase angle fired thyristor unit operating in conjunction with a low voltage secondary isolating transformer providing the correct operating parameters for the heating elements.

## OPTIONAL FEATURES

- Work tubes of various materials, lengths and diameters for use in the furnace.
- The work tubes are available for containment of atmosphere or protection against process contaminants.
- A variety of triple flange gas tight end seals for work tubes to allow processing under gas atmospheres.
- Multi segment, multi program storage controllers.
- Thermal Radiation Plugs.
